Rottneros updates its long-term targets

Rottneros' vision to "Always make a difference" is further enhanced by adding environmental targets to the previously communicated sustainability targets. From 2021 emissions to water (COD) and fossil-free production (CO₂) will be added as long-term targets, with the ambition to continuously reduce our environmental impact.

Rottneros is part of the circular economy and contributes with wood-based, renewable and recyclable products. Emissions of fossil carbon dioxide from the pulp mills in Vallvik and Rottneros come mainly from fossil fuels and the purchase of electricity. In line with this, Rottneros has set the target of achieving fossil-free production by 2030. During 2021 the Group will develop an action plan for how the production units shall reach the target.

Rottneros' long-term target, to continuously reduce emissions to water, is also raised in the external reporting from 2021.

Rottneros' updated long-term targets:

FINANCIAL TARGETS		SOCIAL TARGETS		ENVIRONMENTAL TARGETS	
Dividend of net result	30-50 %	Safety	Zero target	Fossil-free production	
Equity ratio	> 50 %	LTIFR 2021 < outcome 2020		acc. to GHG Scope 1 & 2	year 2030
Pulp production/annum	+ 3 %	Share of female employees 2025	> 30 %	Emissions of COD/t	yearly improvement
Income, other than pulp share 2023	> 10 %

The information was submitted, through the agency of the above contact person, for publication on 4 February 2021 at 08.15 CET.

Rottneros is an independent producer of market pulp. The Group comprises the parent company Rottneros AB, listed on Nasdaq Stockholm, and its subsidiaries Rottneros Bruk AB and Vallviks Bruk AB with operations involving the production and sale of market pulp. The Group also includes Rottneros Packaging AB, which manufactures fibre trays, and the wood procurement company SIA Rottneros Baltic in Latvia and the forest operator Nykvist Skogs AB. The Group has about 318 employees and had a turnover of approximately SEK 2.1 billion in the 2020 financial year.
